Overview

Amit Shah leads Littler's digital transformation strategy, including technology infrastructure, applications, data governance and storage, and security services. He focuses on keeping the firm at the forefront of innovation through the exploration of new initiatives.

Amit has nearly 30 years of experience, including managing technology systems at Fortune 500 companies and designing long-term digital strategies to modernize operations, enhance cybersecurity, and advance business goals. His background also includes overseeing sophisticated technology platforms, complex networks of enterprise applications vendors, and large global technology teams. Amit also has experience in AI and machine learning, including incorporating AI into existing tools and products.
